About Oxford Computer Group (OCG)

Oxford Computer Group are experts in identity and access, device management and enterprise mobility.

Our IT infrastructure solutions help you stay in control.

We make organisations' IT systems work efficiently with identity and access management, device management, information protection and systems management solutions.

In the IT world, change is a given. Moving to the cloud, enabling devices, rolling out applications – whatever you are doing – you must ensure that the right people access the right corporate data from the devices and locations you choose. That's where OCG comes in; helping you to stay in control with identity management, device management and information protection.

Since 2002, we have completed more than 700 enterprise projects and trained more than 6,000 IT professionals in Europe and North America. We are run by the same down-to-earth and approachable people who founded the company in 1983.

FAQs

Who do you work with?
We work with people at all levels in organisations of all sizes and sectors in the UK and North America. We have trained thousands of staff and worked on hundreds of projects; some lasting just a couple of days as well as enterprise-wide deployments of new technologies spanning continents.

Our history
OCG was founded in Oxford in 1983 by our CEO, Hugh Simpson-Wells, who understood that the future was in technology. We have a long history of working closely with Microsoft as new products have been developed. OCG were Microsoft's Partner of the Year finalists in 2007, 2009, 2010, 2011 and 2012 and winners in 1991, 1993, 2000, 2008, 2013 and 2014.

Our expertise
Our people combine bright, technical and business brains with a wealth of experience. They will talk to you in language you'll understand, whether you're technical yourself or not. Our team have industry-standard qualifications and are recognised as experts in their field. We test Microsoft products for Microsoft before they go to market; we sit on panels that develop technical roadmaps. We write Microsoft courses, we train Microsoft people and we train our competitors.

Our approach
We care about your project because once we're on board with you, it's our project, too. We'll listen carefully to you to understand precisely what it is you need to achieve. We will examine your existing infrastructure, schedule and budget. Our can-do attitude, personal service and 100% commitment means that together we'll define your problem and find a way to fix it.
